Ms. Valerie Hollingsworth-Baker,
International Grand Basileus
Zeta Phi Beta Sorority, Inc.
1734 New Hampshire Ave. NW
Washington D.C. 20009

Dear Ms. Hollingsworth-Baker,

Thank you to the Zeta Phi Beta Sorority, Inc. for becoming an *All of Us* Research Program Champion! The National Institutes of Health looks forward to partnering with you to promote awareness of this program to your community.

As you know, the *All of Us* Research Program is an ambitious effort to gather data from one million or more people living in the United States to accelerate research and improve health. The program will be open to people both healthy and sick, from all communities. *All of Us* will serve as a national research resource to inform thousands of studies, covering a wide variety of health conditions that affect many different people.

For far too long, the benefits of medical research have eluded many of our communities. Even for those eager to take part, there can be many barriers to participating in medical research. We aim to change that, because we cannot improve health care for all if we do not include every one of us in health research. The participants who join *All of Us* will be partners in a journey to help usher in a new era of medicine in which researchers, health care providers, and patients work together to develop individualized care.

All of Us recognizes that this journey will take trusted partners, like you, to communicate the importance of the program and the value of participation to the people you serve and represent. We know there are many competing priorities within your organization, and we appreciate all that you are doing to help raise awareness and educate your community about the *All of Us* Research Program.

Thank you again for your support in this collective effort to advance the health of generations to come.

Sincerely,

A handwritten signature in black ink that reads "Eric Dishman". The signature is written in a cursive style with a large, stylized "E" and "D".

Eric Dishman
